4. A leach field which serves as the sewage disposal system of both the Prills Property and the Purchasers' Property is partially located on the Prills' Land and the Pasture Land.

5. It has not been legally established who originally paid for and/or owns the underground leach field, and the Prills and Yvonne H. Prill have been equally sharing in the use of the leach field for many years.

7. Consequently, the Prills and the Purchasers wish to enter into an agreement for the use and maintenance of the leach field to ensure equal and fair access and cost regarding use and maintenance of the existing leach field.

Agreement

NOW THEREFORE, IN CONSIDERATION of the premises, and the mutual covenants and conditions set forth herein, the Prills and the Purchasers agree as follows:

I. **Use and Maintenance of Leach Field:** Both parties shall have equal right to use the leach field, which is located partially under the pasture land, for the purpose of disposing of the excess water from each party's septic tank. Said right shall continue for so long as the leach field is reasonably able to handle the water from both parties. Neither party shall discharge any toxic or hazardous substance into the leach field. Each party shall be obligated to pay one-half (1/2) of the cost of maintaining and operating the said leach field. In the event the leach field needs small to moderate repair, maintenance, or improvements in order to function properly, either party may contract for such services, shall pay the provider of such services (thus becoming the payee) and then bill the other party for their corresponding amount due. In the event of said circumstances, it is preferred that the Prill's take the initial action of contracting with a repair company, if they can do so in a reasonable and timely manner, since at least a portion of the leach field is beneath their property. Unless there is a separate written agreement in place, the other party's portion of such costs is limited to five hundred (500) dollars, and shall be paid immediately after having been provided with a statement showing the amount and nature of such costs. In the event the other party fails to reimburse the payee all such funds when due after thirty (30) days following written notice thereof in addition to any other remedy available at law or in equity, and without

regard to an election of remedies, the payee shall have the right to seek collection from the other party. In the event that a substantial upgrade or repair is sought by either party that requires a significant modification or expansion of the shared leach field or its' components beyond one thousand (1000) dollars total, a new and separate written agreement shall be developed, negotiated, mediated, or arbitrated before any modifications begin, that seeks to fairly share the costs of such upgrades and as a result of shared costs, seeks continued equal rights of use by both parties. Without prior written agreement, no party may make physical modifications to or take actions on the leach field or its' access plumbing, nor other activities occur of any sort, that limit the other party's ability to continue using the leach field to discharge normal and standard amounts of household effluent.

II. Covenant to Run With Land: This Agreement shall be a covenant which shall run with the land and shall inure to the benefit of the parties hereto and to their successors in interest.
