Sheridan Memorial Hospital - 2006

Executive Summary

One of the most important requirements of a community is access to quality healthcare. For over 100 years, Sheridan Memorial Hospital has been serving our community, and fulfilling that requirement. With progressive, state-of-the-art facilities, sophisticated technology and services beyond what one might expect in a hospital this size, patients can take comfort in knowing they are receiving high quality care.

Sheridan Memorial Hospital has been in its present location since 1952. With great forethought, the county leadership placed the hospital in an area that would allow future growth for buildings and parking. This is a luxury that very few hospitals enjoy. The original building was on the outskirts of the City. Since that time the city has expanded and now completely surrounds the Hospital campus.

Converting the campus to a "Medical Arts District" will allow the hospital to provide our patients and visitors important wayfinding signage not allowed in the current R-3 zone. This master plan shows the current health oriented campus, and projected areas to provide facilities for future needs. It is Sheridan Memorial Hospital's goal to maintain a therapeutic "park-like" setting that is consistent with the existing neighborhood.

Re: Request for zoning change to a Medical Arts District

Dear Mr. Craig,

As the Chief Executive Officer for Sheridan Memorial Hospital, I am authorized to request that the hospital campus zoning as defined in the Master Plan submitted with this request, be changed to a Medical Arts District.

Please feel free to contact me at 672-1044 (o) or 752-4555 (c) with any questions concerning this request for a zoning change for the hospital.

Sincerely,

Mike McCafferty, CEO
Sheridan Memorial Hospital

Enclosures

Building Design

Sheridan Memorial Hospital uses a variety of building design styles. The preferred construction method is masonry exterior, store-front windows, and flat roofs. Other construction methods are used as desired, depending upon the purpose of the building or for aesthetics. Future building envelopes will be constructed that are consistent with existing designs, as reflected in attached photos.

Building Setbacks

Sheridan Memorial Hospital will use the following setbacks:

Front yard – 5 feet

Rear yard – 5 feet

Side yard – 5 feet

New construction designs will be sensitive to residential neighbors. Whenever possible, building construction will utilize a minimum setback of 25 feet for all directions from property line. In the future, setbacks may have to be the minimum of 5 feet (depending upon the location of parking lots). Setbacks less than 25 feet will be used for buildings less than thirty-five (35) feet in height.

Typical Landscaping

Landscaping will be consistent with existing installations, as reflected below. Whenever possible, plants selected will be non-disease prone, and non-invasive species.

Open space, parkland, areas of protected natural habitat

Future construction will always consider open space to be an important part of the design. The parklike setting that the Hospital promotes will continue, with the consideration that a minimum of 10% of the campus will include “park-like” amenities (grass, shrubs, flowers, trees, walking paths, outdoor seating).

Drainage Plan

Sheridan Memorial Hospital has an existing drainage system in place, approved by DEQ and City of Sheridan. All future building projects will have drainage systems and stormwater management consistent with existing facilities and will be designed and approved with future building permits.

Parking Plan

See attached parking study

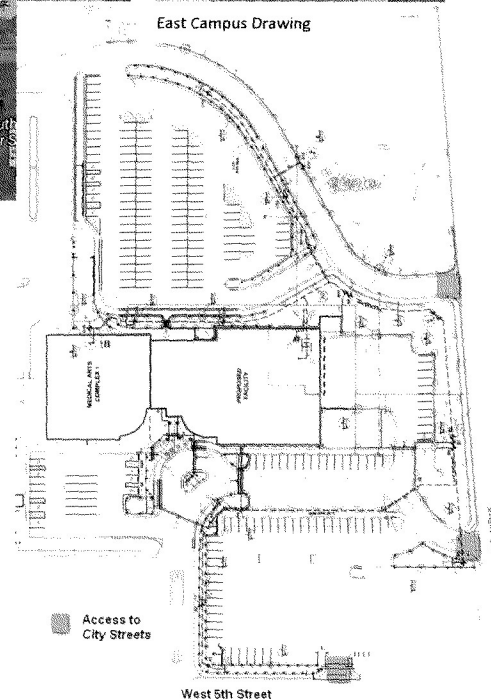

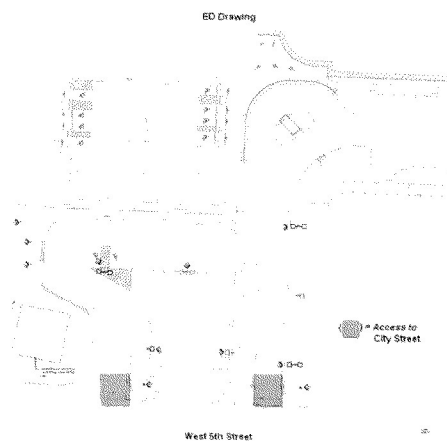

Conceptual Transportation Plan

Existing transportation amenities include access points to City streets for vehicular traffic. The access points are well placed for patients, visitors, staff and delivery vehicles to access the desired location on the campus. Non-motorized traffic (i.e. walking, bicycle) linkages are also existing, including sidewalks and direct access to the Sheridan Pathways. Future construction will give consideration to multi-modal linkages.

■ Access points to City Streets
■ Main Drive

■ Access point to Pathway

Signage

Sheridan Memorial Hospital uses signage for patient and visitor wayfinding. Signs are placed at strategic locations to allow visitors and patients the ability to find their destination and parking areas. Signs are located at access intersections with city streets, driveways, parking lots and building exteriors. Sign sizes are selected to promote wayfinding, as opposed to advertising. Maximum height will be 14 feet on 5th street frontage, 10 feet on Highland Avenue. Signs will be consistent with existing and proposed typical signs below.
